**Professionalization
of trainers for work
based basic skills**

www.profi-train.de

PROFI-TRAIN

Work based basic skills is a European response to European problems; the transnational need for further steps of professionalization to ensure high-quality learning offers is evident. With **PROFI-TRAIN**, a significant step is being taken to enable vocational training for low-qualified in enterprises on a high-quality level across national borders. The project is also a response to the current Council Recommendation on Continuing Education "New Opportunities for Adults".

PROFI-TRAIN aims at the development of a transferable and flexible professional training concept for experts in adult education and vocational training – teaching, guiding and disposing experts – in order to contribute to professional development and on this for the professionalization of the initiative „work based basic skills for low-qualified employees“.

PROJECT RESULTS

PROFI-TRAIN develops, tests and evaluates a professional training concept „**Trainer-competence for work based basic skills**“ consisting of three building blocks:

- ◆ **Manual for self-study**
- ◆ **Six training modules for face-to-face seminars**
- ◆ **Training guide** for stakeholders

On a broader scale, the concept will be made available to national and European actors of vocational training, train-the-trainer-education and other national and European decision makers in politics.

USERS & BENEFITS

- ◆ Adult education and relevant active persons in the **PROFI-TRAIN** partner countries will have developed their skills in order to professionally realize work based basic skills offers.
- ◆ Continuing education and vocational training institutions can set up work based basic skills training offers after their staff was professionalized
- ◆ Higher education institutions and relevant train-the-trainer providers can integrate and use the **PROFI-TRAIN** professional training concept „Trainer-competence for work based basic skills“ into their curricula and their performance spectrum, thus contributing to sustainable use.
- ◆ Decision-makers in politics and stakeholders at national and European level can make use of the results of the project work within labour-policy programs and strategies to increase the participation of low qualified in vocational training and to strengthen work based learning (WBL) for these target groups.
